WEBINAR

TOLL PROCESSING OF AGROCHEMICALS

Beginning with explanation and definition of toll grinding, the possible reasons for using services are discussed. An Overview of the processing possibilities and site location descriptions makes the potentials of toll processing round. To perform customer requirements optimally, our today's strengths have been developed. A clear differentiation identifies which materials are processed or not processed.

Storage and packing is organized according to customer's request. Product quality, mainly particle size distribution, is guaranteed and ensured by using essential measurement equipment. Mechanical processing is realized by newest machine and plant technology and is under continuous upgrading and expansion.

Sustainability one of our main important goals and arises in our handling of waste and energy saving.
